

1 **EU-TYPE EXAMINATION CERTIFICATE**

2 Equipment intended for use in Potentially Explosive Atmospheres Directive 2014/34/EU

3 Certificate Number: **Sira 11ATEX1104X** Issue: **5**

4 Equipment: **Range of Linear Position Transducers BTL5 and BTL7**

5 Applicant: **Balluff Inc.**

6 Address: **8125 Holton Drive, Florence, Kentucky 41042, USA**

7 This equipment and any acceptable variation thereto is specified in the schedule to this certificate and the documents therein referred to.

8 CSA Group Netherlands B.V., notified body number 2813 in accordance with Articles 17 and 21 of Directive 2014/34/EU of the European Parliament and of the Council, dated 26 February 2014, certifies that this equipment has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of equipment intended for use in potentially explosive atmospheres given in Annex II to the Directive.

The examination and test results are recorded in the confidential reports listed in Section 14.2.

9 Compliance with the Essential Health and Safety Requirements, with the exception of those listed in the schedule to this certificate, has been assured by compliance with the following documents:

EN IEC 60079-0:2018 EN 60079-1:2014 EN 60079-31:2014 EN 60079-26:2015

10 If the sign 'X' is placed after the certificate number, it indicates that the equipment is subject to Specific Conditions of Use identified in the schedule to this certificate.

11 This EU-Type Examination Certificate relates only to the design and construction of the specified equipment. If applicable, further requirements of this Directive apply to the manufacture and supply of this equipment.

12 The marking of the equipment shall include the following:

BTL5

13 DESCRIPTION OF EQUIPMENT

The BTL Series Linear Position Transducers are used for linear position measurement feedback applications. The output signal may be a digital pulse output, an analogue voltage or current output that corresponds to measured position. The Linear Position Transducers consist of stainless steel pressure housing and threaded screw on cover, with internal electrical devices rated for voltages 24 Vdc \pm 20% or in the range 10 Vdc to 30 Vdc, 3 W max for the BTL5 and 10 Vdc to 30 Vdc, 5 W max for the BTL7. The model code breakdown for the BTL series Linear Position Transducers is as follows:

Key

- Q = Quadrature output
- S = SSI output
- T = Profibus DP output
- H = CANopen output
- V = EtherCAT output
- x = 5 or 7
- a = Digital pulse output: I, K, L, M, N, P or R.
- b = Analog output: A, B, C, E or G.
- c = Supply voltage: 1 or 5.
- d = Analog output signal characteristic: 0, 1 or 7 for BTL5 or 00, 01, 02, 03, 04, 05, 06, 07, 10, 11, 70 for BTL7
- e = Quadrature output signal frequency: 0, 1, 2 or 6.
- f = Quadrature output resolution: 0, 1, 2, 3, 5, 6, 7 or 8.
- g = Quadrature output mode/update rate: 0, 1, 2 or 4.
- h = SSI output signal type, resolution and mode: Any alpha/numeric code (up to 3 digits) not effecting the Flameproof protection method)
- i = BTL7 P/M Interface without DPI/IP interface: 10. BTL7 P/M Interface with DPI/IP interface: 11. Blank for BTL5.
- j = Profibus output software configuration: 1, 2 or 3.
- k = CANbus output software configuration: 1, 2 or 3.
- l = CANbus output baud rate: 0, 1, 2, 3, 4, 5, 6, 7 or 8.
- m = Stroke length in millimeters (Maximums: BTL5 = 5080 & BTL7 = 7620)
- n = Interrogation method (if a = "R", otherwise blank): E or I.
- o = Recirculation count (if a = "R", otherwise blank): 1 to 16.
- q = Number of magnets or address setting (Any alpha/numeric code not effecting the Flameproof protection method)
- r = Protocol type (Any alpha/numeric code not effecting the Flameproof protection method)
- * = S or M = Special electrical or internal mechanical modifications not affecting scheduled drawings or the Flame-proof Protection methods and not exceeding 3W for the BTL5 and 5W for the BTL7, followed by a 4 alpha/numeric combination (may also be left blank)
- ** = Entry code: TA12 = one modified 1/2"-14NPT entry and Kp = Certified cable gland with Pre-wired profibus cable length (two digit code represented in meters): 00 to 50

BTLx-aci-Mm-J-DEXC- * - ** -no

Note:

The IP68 rating includes a submersion rating of 167 ft (51 m) for 48 hours (TA model codes).
The IP68 rating includes a submersion rating of 167 ft (51 m) for 30 minutes (Kp model codes).

Project Number 80156981

This certificate and its schedules may only be reproduced in its entirety and without change

SCHEDULE

EU-TYPE EXAMINATION CERTIFICATE

Sira 11ATEX1104X
Issue 5

Variation 1 - This variation introduced the following changes:

- i. The introduction of a new model, the Series BTL7, the certification code applicable to this model is:
Ex d IIC T6 Ga/Gb or Ex d IIC T5 Ga/Gb
Ex t IIIC T85 Da IP68 Ex t IIIC T100 Da IP68
Tamb -50°C to +70°C Tamb -50°C to +80°C
The description was amended to recognise the BTL7 and to revise the model coding.
- ii. Alternative cover materials were allowed to be used: Nitronic 60, SS316L, European equivalents 1.4404, 1.4571, and 14305
- iii. The lower ambient temperature limit of the Series BTL5 was reduced from -20°C to -50°C.
- iv. The cover o-ring was replaced; the new version is made from the same base material as the original, but can be used at lower temperatures.
- v. Following appropriate assessment to demonstrate compliance with the latest technical knowledge, EN 60079-0:2009, EN 60079-1:2007, EN 60079-31:2009 and EN 60079-26:2007 were replaced by EN 60079-0:2012, EN 60079-1:2014, EN 60079-31:2014 and EN 60079-26:2015.

Variation 2 - This variation introduced the following changes:

- i. The recognition of minor drawing modifications; updated the locking screw, dimensional changes, introduction of tolerances and the updating of the approvals block; these amendments are administrative or involve changes to the design that do not affect the aspects of the product that are relevant to explosion safety.
- ii. The removal of Balluff GmbH Neuhausen Germany from the list of additional manufacturing locations.
- iii. The assessment standards were updated to reflect the standards update conducted on report R70025516 (Variation 1)

Variation 3 - This variation introduced the following changes:

- i. The recognition of minor drawing modifications. These amendments are administrative or involve changes to the design that do not affect the aspects of the product that are relevant to explosion safety.

Variation 4 - This variation introduced the following changes:

- i. Update to certification with reformatted drawings. These amendments are administrative or involve changes to the design that do not affect the aspects of the product that are relevant to explosion safety except for the new o-ring.
- ii. Addition of new cover to base o-ring.
- iii. Update standard EN 60079-0:2012 to EN IEC 60079-0:2018.

15 SPECIFIC CONDITIONS OF USE (denoted by X after the certificate number)

- 15.1 When installed across a Zone 0 and Zone 1 boundary, the user/installer shall make sure that the equipment is installed in such a manner to ensure that the joint across the boundary is sufficiently tight in accordance with clause 4.3 of EN 60079-26.

16 ESSENTIAL HEALTH AND SAFETY REQUIREMENTS OF ANNEX II (EHSRs)

The relevant EHSRs that are not addressed by the standards listed in this certificate have been identified and individually assessed in the reports listed in Section 14.2.

17 CONDITIONS OF MANUFACTURE

- 17.1 The use of this certificate is subject to the Regulations Applicable to Holders of CSA Group Netherlands B.V. certificates.
- 17.2 Holders of EU-Type Examination Certificates are required to comply with the conformity to type requirements defined in Article 13 of Directive 2014/34/EU.
- 17.3 Each enclosure shall be subjected to a routine overpressure test required to 89.63 Bar (1300psi) in accordance with clause 16 of EN 60079-1:2007. The pressure shall be maintained for at least 10s and the enclosure shall show no signs of permanent deformation or damage.
